CHAPTER 4
PROCESS MODELLING

Diagram showing the flow of data in the system is called data-flow-diagram. It has three main components.

1. **External Agent:** Entities which interacts with system is called external agent.
2. **Datastores:** The place where the data in the system is stored is called datastore.
3. **Processes:** It is the function that causes data to be processed an within the system.

These shapes are predefined in the service that we used for creating diagrams.
